

Front-End Developer

Glamorous AI, as part of X-Chem, are building the first artificial intelligence powered platform for drug discovery. By integrating large data, domain expertise and AI we believe we can deliver a transformation in how we discover, analyse and test drug candidates.

We have a multi-disciplinary team of experts in AI and chemistry who want to make a difference by building the best tools and technologies to advance medicine discovery. Our team in London has some of the leaders in AI in biotech and has won several awards for their research and contributions to the healthcare industry.

We have exciting growth plans and are looking for a skilled Front-End Developer to join us on our mission!

If you are a mission-driven individual who wants to make an impact and who believes in data and AI, get in touch!

The Role:

Working alongside our engineering team, you will develop, implement and test the UI of a state-of-the-art AI platform. Performance and scalability are key to our success.

Responsibilities:

- Create robust and scalable front-end interfaces using **React**
- Plan and implement tests to maintain front-end integrity
- Enhance existing code to bring it in line with modern standards
- Identify and implement new front-end technologies
- Apply industry best practice to the code base
- Work and follow designs and UI/UX guidelines, leveraging repositories of React components
- Support resolution of production issues

Qualifications:

- A degree in computer science, software engineering or related subject.
- Or strong equivalent work experience

Minimum Requirements:

- Commercial front-end development experience
- Strong experience in **HTML, CSS, JS, React** and **Node.js**
- Solid understanding of **React.JS** fundamentals, including Hooks, JSS
- Solid understanding of **Modern JS** (arrow functions, de-structuring, promises etc)
- Familiarity with scalable front-end development (performance, modular code, testing frameworks etc)
- Understanding of UX and UI principles
- Demonstrate the ability to thrive in a fast-paced, collaborative, agile environment
- Good communication and interpersonal skills

Preferred qualifications:

- Experience with full-stack development
- Experience with user research & UX design

We Offer:

- Talented, motivated, interesting and experienced co-workers
- Intellectual challenge solving meaningful problems
- We organise ourselves in groups of small teams and there is plenty of opportunity for a high degree of ownership over different areas of the product, and you will be directly exposed to all areas of the business
- Your voice will always be heard. What you do or say counts
- We are a cross-disciplinary team and come from all backgrounds and countries
- Monthly social activities
- Competitive salary and benefits
- Flexibility around remote working

We believe that diversity makes for innovative, exceptional teams. X-Chem is an equal opportunity employer, committed to addressing the diversity and inclusion problem in the tech industry. That starts with making sure we have a diverse team where everyone feels at home and can contribute as an equal.
